

# A.P.S.

Abnormality, Prevention, Service.

Serving humanity since 1997

**Class:**

agressive, humanoid, spreading

**Authority:**

A.P.S. security and research department,  
goverment forces

**Name:**

Un-suspicious Dead Bodies

This disease's origin is unknown, and its effects cant be explained by human science, this is why it is under APS documentation, goverment forces are also informed about it to prevent people from going into this "minefield"

Our researchers call this anomaly a "minefield" because it takes up space and since moving it would be risky, we are letting it stay and infect a specific zone.

This abnormal object is thought to be a disease, but we arent sure, it could also be any other thing like multi dimensional effect areas.

It first appeared at 2001 in a cornfield, a man called the police for suspicious siluettes in his yard, police identified these to be "laying people" or "corpses" so they approached them.

Every personnel that came withing 5 meters of these corpses experienced a seizure (describable as a hearth attack), and fell to the ground, these personnel do not respond to any thing happening in our world, they dont respond or blink.

Anybody that has fallen to the ground are also described as "corpses" because they have the same anomalous effect as the other corpses.

All of the corpses in this field except for 2 has been identified, one of the un-identifiable 2 is almost completely rotten, and the other one is in perfect condition but has no human specific features (no face, no skin wrinkles, no teeth or nails, no hair)

Our researchers are believing that faceless corpse is the source of all these anomalous effects, and the rotten corpse is its first victim.

These corpses for sure can be removed with a crane, but still it can somehow came within 5 meters of the personnel and that could cause a chain reaction, or it could affect animals.

So these corpses will not be moved, the cornfield will be hidden from the public.

asking questions about the cornfield is forbidden, doing that will result in your EXECUTION. Do NOT question this order!
